Candida auris Webinars & Office Hours Series for Local Health Departments

NEW! New Jersey Department of Health (NJDOH) is offering a webinar and office hours series for LHDs to provide practical education and training in routine *C. auris* surveillance, case investigation, and outbreak response. *C. auris* became a reportable condition in New Jersey in January 2026 and LHDs will start doing routine case investigations by January 2027.

These sessions will equip participants with the knowledge, tools, and guidance needed to confidently identify, investigate, and respond to *C. auris* cases and outbreaks. **Please review the table below for more information.**

Date	Time	Title	Link to Register
